Schio

Direttore: Remigio Sangoi

Year of foundation: 1996

Origins and development: In 1996, following the results of a research issued by the district of Schio "Vocational Training, school and the workplace in Schio – perspective and reality" and under the invitation of the same municipal administration association, the CNOS-FAP started the first courses of the Vocational Training Centre. Special attention and care was given to kids and young people with disabilities, providing them with special training plans, aimed at achieving the essential skills and knowledge necessary for a qualified introduction to the civil society and in the world of work. In these recent years the demand for help from many non-European immigrants in our territory has become increasingly urgent, attracted by the manpower demand that many companies display. The Centre has provided staff and special areas, both for cultural education (literacy classes and socialization) and for targeted job placement courses and training.

Sectors and activities today: it promotes Initial Vocational Training activities.

It mainly operates in Electrical/Electronic, Business services, Agricultural, Mechanical and Automation sector.
